**ENERGY INNOVATIONS CEO TO SPEAK AT SOLAR POWER INTERNATIONAL**

Energy Innovations, Inc., manufacturer of high concentration solar modules and systems, announced today that Joe Budano, Energy Innovations CEO, will be speaking at Solar Power International as part of a Concentrated Photovoltaic panel discussing CPV technology, applications, and issues. The CPV panel session is scheduled for Tuesday October 27<sup>th</sup> at 2:00pm.

This session will explore CPV technologies, applications, and issues, while discussing whether CPV is a 'better' mousetrap. The audience will learn where CPV fits in between traditional photovoltaic and concentrating solar thermal applications and what technology issues should be considered as market, cost, and business models are assessed.
